

ASTRASTRIP PG5

Detailed Description

A low tack masking film. Astrastrip PG5 is a UV-opaque green masking film coated onto a clear polyester base, specially formulated for use in graphic arts and screen printing and possessing good anti-static properties.

Technical Information

Astrastrip PG5 consists of a nominal 35µm thick flexible green nitrocellulose membrane coated onto a clear 100µm polyester carrier film. The strong mechanical properties and flexibility of the membrane allow for a consistent easy release, resistant to accidental transfer, snapping or tearing, which enables easy weeding for reduced make-ready time.

Applications

PG5 is constructed for art/camera and photographic stencil preparation departments and for screen printers. The mechanical properties of the membrane allows intricate detail to be achieved using CAD cutters and plotters.

Handling and Storage

Avoid direct exposure to sunlight or excessive temperatures. Store in a cool and dry environment
