

TECHNICAL DATA SHEET

ASTRASTRIP RT4S

Detailed Description

A low tack masking film. Astrastrip Red RT4S is a UV-opaque red masking film coated onto a clear polyester base, specially formulated for use in graphic arts and screen printing, with good anti-static qualities.

Technical Information

Physical Characteristics:

RT4 S is a 35 microns Red polyurethane membrane. The membrane is coated onto a 100 microns clear polyester carrier substrate. The strong elasticated stripping membrane is flexible to give a controlled and easy release, resistant to accidental transfer, snapping or tearing, enabling easy weeding for reducing make-ready time.

Suitable Applications:

RT4S is a low tack self-adhesive stripping film, formulated for the art/camera and photographic stencil preparation departments and Screen printers. The stronger membrane of RT4S makes it ideal for use with CAD cutters and plotters, allowing intricate detail work to be achieved.

Handling and Storage:

Do not expose directly to solar radiation and heat sources. Store in a cool and dry environment. (15-30°Centigrade)

Ecological Information:

Product is not soluble in water. Under proper handling no disadvantageous effects on the environment are known.
