TECHNICAL DATA SHEET

Synplas SPC – Print receptive Synthetic paper

Product Description

Synplas SPC is a calendared synthetic paper for use in the offset printing, flexo and screen processes. The material is durable, water resistant and versatile, it can be punched, stitched, glued and creased. It has a card like feel to it due to its increased thicknesses.

Typical Applications

Recommended for use in

- Labels,
- Banners,
- Loyalty cards,
- Posters,
- Horticultural tags,
- Book Dividers,

Key Features

Synplas SPC is an uncoated material, but printable on either side. It has a very good tear resistance in one direction only and has excellent folding characteristics with card like stiffness. The material is 100% recyclable and meets today's environmental requirements.

Sizes Available

Can be purchased in roll form or as sheeted material. Maximum width of 1300mm in roll form. Sheet sizes can be tailored to customer requirements. Available in thicknesses from 250 μ to 500 μ .
